

## Accessibility features of BOC branches available for meeting CISCO customers

Accessibility feature	Description
Step-free access to entrance	The main entryway has a flat or gently sloped pathway, allowing all visitors, regardless of mobility level, to enter comfortably without barriers.
Automatic door	Doors open automatically via sensors or push-button controls, providing access that benefits wheelchair users, those with limited dexterity, and anyone carrying items.
Accessible toilet	A restroom designed for ease of use, featuring wider doors, grab bars, lower sinks, and ample space for wheelchair navigation and assistance if needed.
Accessible parking	Designated parking bays with extra space for ramp-equipped vehicles and easy movement around cars for those using mobility aids. Note that Blue Badges must be displayed.
Soundproof and private meeting room	A confidential space shielded from external noise and enclosed to ensure visual privacy. Designed to support individuals who require sign language interpretation by ensuring confidentiality, and also beneficial for those with sensory sensitivities who thrive in low-stimulus settings.
